

# THE GUIDE TO YOUR STAR STUDENT REPORT CALIFORNIA STANDARDS TESTS

CALIFORNIA DEPARTMENT OF EDUCATION

This guide will help you follow your child's report and the recommendations that are provided. Some sections of your child's report are translated word for word, and other sections are translated more generally.

## 1 Your child's information

Here you find your child's student number, date of birth, grade, test date, school, and district. If available, your mailing address also appears in this section.

## 2 Introductory Letter from the State Superintendent of Public Instruction

Dear Parent/Guardian,

Each year, California's Standardized Testing and Reporting (STAR) Program measures your child's progress in meeting California's world class content standards. These standards describe what all students should know and be able to do at each grade level.

This report shows your child's scores on the STAR Program tests. I encourage you to discuss these results with your child and your child's teacher(s). Besides giving you valuable information about your child's academic strengths and weaknesses, test scores help us understand how well our schools are doing and how we might do better in the most important job of all – preparing students to succeed in school and beyond.

## 3 Your child's scale scores and performance levels

See how your child did on the California Standards Tests (CSTs) by looking at the vertical black bars below each subject heading. The number at the top of each bar is your child's exact test score in that subject. The colored boxes to the left and the text at the bottom of each black bar provide your child's performance level in each subject. There are five performance levels: advanced, proficient, basic, below basic, and far below basic. The goal in California is to have all students perform at the proficient or advanced level.

Students in grades two through eleven are tested in English–language arts and mathematics. Students in grades five, eight, and ten are tested in science, and some high school students also may take end-of-course science tests. All students in grades eight and eleven are tested in history–social science, and some high school students take an end-of-course world history test. Scores are provided for all of the tests your child took. If your child did not take one or more of these tests or if a score was not to be reported, this is noted on your child's report.

## 4 You can find complete STAR Program results on the California Department of Education (CDE) STAR Results Web page at <http://star.cde.ca.gov> and your school's accountability report card on the CDE School Accountability Report Card (SARC) Web page at <http://www.cde.ca.gov/ta/ac/sa/>. You can also request a copy of the SARC from your child's school.

## 5 How should I use these STAR Program results?

This section suggests ways to monitor your child's educational progress, including through classroom tests, assignments, and grades. You can use these sources of information to talk with your child's teacher about specific areas for improvement.
